

Research Publications (National / International journals) Many of the papers are published in journals of repute with high NAAS Score.

Book: Cereals: Processing and Nutritional Quality. Sewa Ram and B. Mishra (2010). New India Publishing Agency, New Delhi.

DWR Vision 2030. Vinod tiwari, CN Mishra, K, Venkatesh, Pradeep Sharma, Vishnu Kumar, SC Gill, B.S. Tyagi, Ratan Tiwari, **Sewa Ram** and Ravish Chatrath. 2011. Directorate of wheat research, Karnal.

1. Ram S., Sharma A. and Sengupta U.K. (1994) Photosynthesis and carbon import in developing leaves of ground nut (*Arachis hypogaea*). **Photosynthetica**, 30(1), 53-58.
2. Ram S., Sharma A. & Sengupta U.K. (1996). Changes in the activities of sucrose metabolising enzymes in developing leaves of groundnut (*Arachis hypogaea* L.) **Photosynthetica** 32 (4): 623-527.
3. B.K. Misra, R.K. Gupta and Sewa Ram (1998). Production of quality wheats for varied domestic needs. *Indian Farming*, vol 48(1), 16-32.
4. Sewa Ram and R.P.S. Verma (1998) Barley Storage proteins for varietal identification and malting quality. *Indian Wheat News letter*. Vol. 4 No. 2. PP 5.
5. B.K. Misra, Jag Shoran, R.K. Gupta, Sewa Ram, B.S. Tyagi and S. Nagarajan (1998) Initiation of special Bread and Durum Wheat Quality trials by AICWIP. *Indian Wheat News letter*. Vol. 4, No. 2 PP 6.
6. B.K. Misra, R.K. Gupta and Sewa Ram (1999). Protocols for evaluation of wheat quality. *Technical Bulletin No. 3*, Pages-66. Directorate of Wheat Research, Karnal.
7. Sewa Ram (2000) Role of alcohol dehydrogenase, malate dehydrogenase and malic enzyme in flooding tolerance in *Brachiaria* species. **Journal of Plant Biochemistry and Biotechnology**. Vol. 9, 45-47.
8. Sewa Ram (2000) Role of sucrose hydrolysing enzymes in flooding tolerance in *Brachiaria* species. *Indian Journal of Plant Physiology*. Vol. 5, No. 1, 68-72.
9. Sewa Ram, B.K. Misra and S. Nagarajan (2001) Biscuit making quality of advance lines of wheat in India. **Journal of Food Science and Technology**. Vol 38(5): 476-479.
10. Sewa Ram and Rajender Singh (2001). Selection criteria for producing wheat having good biscuit making quality. *Indian Wheat News letter*. July-December 2001, Vol. 7 No.2, pp9.
11. Sewa Ram and R.P.S. Verma (2002). β -glucan content and wort filtration rate in Indian barleys. **Cereal Research Communications**. 30(1): 181-86.
12. Sewa Ram, E. Boyko, M.J. Giroux and B.S. Gill 2002. Null mutation in pin A is prevalent in Indian Wheats: Puroindoline genes are located in the distal part of short arm of 5D chromosome. **Journal of Plant Biochemistry and Biotechnology**. Vol. 11: 79-83.
13. Gupta, R.K., Sewa Ram and Chauhan, D.S. (2002). Quality of Indian Wheat, Directorate of Wheat Research, Karnal – 132001, India, Research Bulletin No. 14: pp 92.
14. R.K. Gupta, **Sewa Ram** and D.S. Chauhan (2004). Quality status of Indian wheat and export possibilities. Proceedings 2nd International Group Meeting on Wheat Technologies for Warmer Areas. (Eds V.S. Rao, Gyanendra Singh and S.C. Misra). pp 292-296.
15. Sewa Ram and Rajender Singh (2004). Identification of molecular tools and micro-level techniques for biscuit making quality of wheat. Proceedings 2nd International Group Meeting on Wheat Technologies for Warmer Areas. (Eds V.S. Rao, Gyanendra Singh and S.C. Misra). pp 100-109.
16. Sewa Ram 2003. High molecular weight glutenin subunit composition of Indian wheats and their relationships with gluten strength. **Journal of Plant Biochemistry and Biotechnology**. Vol 12: 151-155.
17. Sewa Ram and R. P. Singh 2004. Solvent retention capacities of Indian wheats and their relationship with biscuit making quality. **Cereal Chemistry**. 81(1): 128-133.
18. Sewa Ram, Nisha Jain, Vinamrata Dawar, R.P. Singh and Jag Shoran 2005. Analyses of Acid-PAGE gliadin pattern of Indian wheats (*Triticum aestivum* L.) representing different environments and periods. **Crop Science**. 45:1256-1263.

19. Sewa Ram, Nisha Jain, Jag Shoran and Randhir Singh 2005. New frame-shift mutation in puroindoline B in Indian wheat cultivars Hyb65 and Ni5439. *Journal of Plant Biochemistry and Biotechnology*. Vol14, 45-48.
20. Sewa Ram, Jag Shoran, R. K. Gupta and S. Kundu 2004. NAP HAL (Indian land race of wheat) has Glu-D1 double null trait and very low gluten strength. *Indian Wheat News letter*. July-December 2003, Vol. 9 No.2, P11.
21. Sewa Ram, Vinamrata Dawar, R.P. Singh, Jag Shoran 2005. Application of solvent retention capacity tests for the prediction of mixing properties of wheat flour. *Journal of Cereal Science*. 42 (2): 261-166.
22. Sewa Ram, Jag Shoran and B. Mishra 2007. Nap Hal (Indian land race of wheat) contains unique genes for better biscuit making quality. *Journal of Plant Biochemistry and Biotechnology*. 16(2): 83-86.
23. Sewa Ram, Vinamrata Bhatia, Veena Jain and B. Mishra 2006. Characterization of low molecular weight glutenin subunit gene representing *Glu-B3* locus of Indian wheat variety NP4. *Journal Plant Biochemistry and Biotechnology*. 15: 79-83.
24. Sewa Ram and B. Mishra 2008. **Review:** Biochemical and Molecular Basis of Processing and Nutritional Quality of Wheat. *Journal of Plant Biochemistry and Biotechnology*. Vol 17(2), 111-126.
25. Sewa Ram, B.S. Tyagi and B. Mishra 2008. Utility of synthetic hexaploids in the improvement of wheat grain quality. *Indian Journal of Genetics and Plant Breeding*. 67(3): 243-247.
26. Sewa Ram and B. Mishra 2007. Advances in improving wheat quality for different end-products in India. *Journal of Wheat Research*. 1: 86-96.
27. Ram S, Agrawal M, Tyagi BS and Mishra B. 2008. Application of Molecular Markers, Micro-level Tests and Interclass Hybridizations in Improving Wheat Grain Quality. Proceedings 11th **International Wheat Genetics Symposium**, Brisbane, Australia. P245.
28. **Sewa Ram**, Shikha Sharma, Anukriti Verma and B.S. Tyagi 2011. Comparative analyses of LMW glutenin alleles in bread wheat using allele specific PCR and SDS-PAGE. *Journal of Cereal Science*. 54(3): 488-493. doi.10.1016/j.jcs.2011.09.004.
29. Sewa Ram, Anukriti Verma and Shikha Sharma, 2010. Large variability exists in Phytase levels among Indian wheat varieties and synthetic hexaploids. *Journal of Cereal Science*. 52, 486-490.
